Individual Contributions:
Kyle Toth:
I did everything so don't really know what to write here.

Lingering Bugs/Issues/Dropped Features
Everything should be working the exact same as the last workshop. I do not believe that there are any bugs present but I have not been able to test every situation that could come up. There are a few errors that are thrown still when checking for items that don't exist but these do not interfere with the intended operation of the website.
